Mitel MiTeam for MiCollab

Break down organizational silos by
connecting employees together - anywhere, anytime

Teamwork doesn't have to be a disconnected disarray of messages and business applications.
It should be personal, flexible, and simple. Because better teamwork leads to business success.

Mitel®

Powering connections

Keep on top of projects, boost the sharing of knowledge and ideas across business silos, and extend the power of teams beyond your organizational walls so they can easily do the same with clients and partners

Team projects can often be sprawling and hard to organize. Ideas, action items, decisions and documents can exist in multiple locations and formats, including email, IMs, voice mail, online storage, individual hard drives, and more. This makes it hard to quickly find or share information.
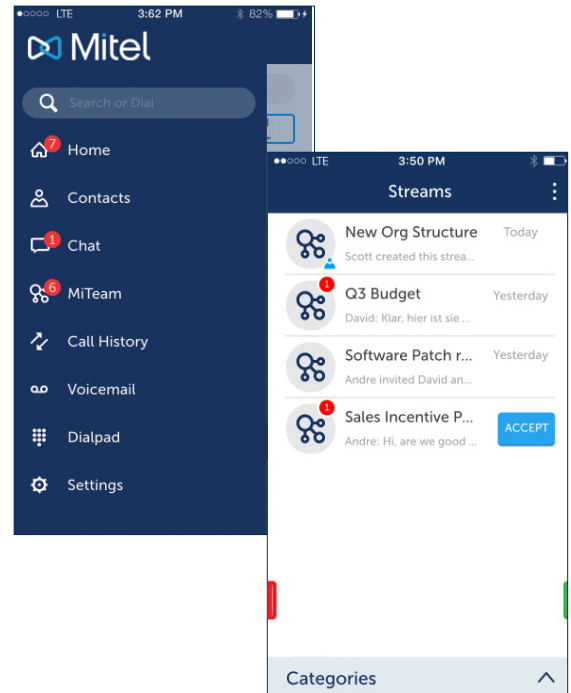

Reduce organization silos and increase your speed to market with an embedded application that extends past your company walls to mobile employees and beyond to external team members.

A Better Way to Collaborate

MiTeam is a workstream communications and collaboration (WCC) tool that more closely aligns to how teams actually work together in today's always-on, mobile workplace.

MiTeam provides a single location to connect with colleagues, partners, and even customers, using collaborative, persistent workspaces all for team-based or project-related activities, including messaging, content sharing, white boarding, task assignment, and real-time voice and collaborative meetings.

With MiTeam all the collaboration tools your organization needs to enable smarter working, reduce organization silos, and foster collaborative relationships are at your fingertips.

Key Benefits

- Single business tool providing essential team working functions that make it easier to find information and keep up to date on projects
- Persistent workspaces provide the convenience of having all team discussions and document changes logged and stored for easy retrieval
- Enables easy access to the knowledge, insights, and experiences of others including external guests
- Review content using a variety of annotation methods, including text, voice and video clip (MP4) creation to provide a complete view of their review
- Developed with mobility in mind collaborate anywhere, on any device, with the same set of tools
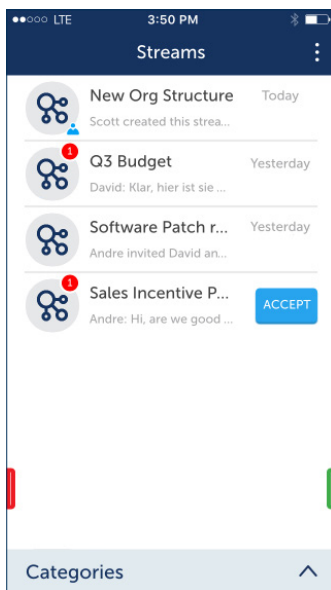

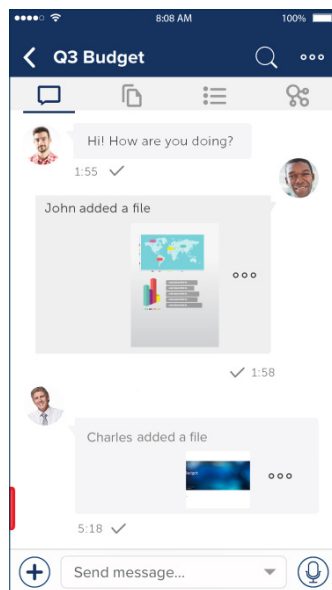

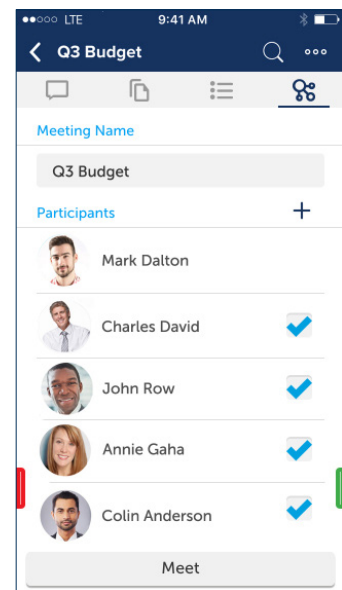

With MiTeam, you can:

- Keep up with projects, stay connected with colleagues and clients, and eliminate cumbersome emails with powerful layers of embedded collaboration

- Consolidate teamwork capabilities into a single window pane, centralizing chats, content sharing, collaborative white board sessions, pictures, videos, presentations, and add rich graphic and vocal annotations

- Assign to-do's with deadlines, reminders, and details and track the progress of project activities with team members all within a single application

- Expand teams past the physical confines of your own organization to include contractors, partners or customers anywhere around the globe

- Enable new team members to come up to speed quickly by seeing interactions with full context, access to documents shared, view recording of meetings and track project tasks

Keep it all Together

MiTeam seamlessly synchronizes everything relevant to your team into Streams, making teamwork easier and faster — whether your project lasts a day or a year, with two people or twenty.

Be More Productive

Streams are persistent collaborative workspaces, which continuously archive your team's history of messages, content, annotations, and tasks for future reference.

Real-time, Anytime

Instantly start a real-time voice or collaboration session with colleagues, partners or customers, directly from your mobile device, with advanced call-control capabilities.
